

Agua en Nueva Zelanda

¿Hay reservas de agua en tu ciudad?

Si, Many of the largest reservas de agua en Nueva Zelanda have been developed principally to produce hydroelectricity. Tambien, el uso incluye irrigation and municipal agua provision.

One of them are The Waikato Hydro estaciones, comenzar desde lago Tauposon Aratiatia, Ohakuri, Atiamuri, Whakamaru, Maraetai, Waipapa, Arapuni and Karapiro.

¿Cuál es el consumo de agua promedio en tu ciudad?

Promedio, 179 litros de agua por persona por día usan en verano y 175 litros en invierno.

TABLE 11 Water allocation and use (millions m³) by sector, 2007-08. (Source: ARC Consents data).

	Municipal	Irrigation	Industry	Community	Other	Total
Allocation	109	13	12	7	6	147
Use	98	5	5	2	1	111

¿Tienen proyectos para reducir el consumo de agua?

En nuestra escuela, we have these grandes tanques verdes that collect agua de lluvia, which uses that agua para nuestros banios. This año, nuestro colegio invested 20,000 dollar para usar el agua de los tanques para beber. MHJC no usa agua de provision de Nueva Zealanda.

¿Llueve mucho en tu ciudad? Está relacionado con los acuíferos?

Si, mucho mas than we prefer. Auckland's groundwater supply comes from rain which percolates down through the soil or rock fractures, filling up the pores between sand grains or the fissures in rock. A small percentage of Auckland's agua para beber es sourced from groundwater supplies. Hay a number of groundwater sources servicing the agua para beber needs of local Auckland communities. These are located at Onehunga, Muriwai, Hamiltons Road (Algies Bay/Snells Beach), Pukekohe, Clarks Beach, Waiuku, Patumahoe, Puni, Bombay, Buckland, Glenbrook Beach, and Waiau Pa.

¿Le dan algún tipo de reconocimiento al Día del Agua en tu país?

No, Nueva Zelanda doesn't celebrate Día del Agua. It is only recognition internationally. The United Nations' World Water Day is March 22 every year.

- Promote the International Year of Water Cooperation and World Water Day: use the logo, our web banners and other campaign materials
- Take action towards water cooperation;
- Send your success stories to UN Water website
- Send your photos, artwork, videos and other creations, and we'll share them with the world; at UN Water website
- Contribute to the formulation of Sustainable Development Goals where water is properly addressed: have your voice heard!
